INDEPENDENT AUDITORS' REPORT

To the Board of Directors of ATC Management Inc., Corporate Manager of American Transmission Company LLC:

We have audited the balance sheet—regulatory basis of American Transmission Company LLC as of December 31, 2003, and the related statements of income—regulatory basis; retained earnings—regulatory basis; cash flows—regulatory basis, and accumulated other comprehensive income, comprehensive income, and hedging activities—regulatory basis for the year then ended, included on pages 110 through 123 of the accompanying Federal Energy Regulatory Commission Form 1. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1, these financial statements were prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America.

In our opinion, such financial statements present fairly, in all material respects, the assets, liabilities, and proprietary capital of American Transmission Company LLC as of December 31, 2003, and the results of its operations and its cash flows for the year then ended, in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

This report is intended solely for the information and use of the board of directors and management of ATC Management Inc. and for filing with the Federal Energy Regulatory Commission and is not intended to be and should not be used by anyone other than these specified parties.

March 25, 2004

Oclaitle 6 Touche LLP

INSTRUCTIONS FOR FILING THE FERC FORM NO. 1

GENERAL INFORMATION

I. Purpose

This form is a regulatory support requirement (18 CFR 141.1). It is designed to collect financial and operational information from major electric utilities, Licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. This report is also secondarily considered to be a nonconfidential public use form supporting a statistical publication (Financial Statistics of Selected Electric Utilities), published by the Energy Information Administration.

II. Who Must Submit

Each major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees Subject to the Provisions of The Federal Power Act (18 CFR 101), must submit this form.

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds

one of the following:

- (1) one million megawatt hours of total annual sales,
- (2) 100 megawatt hours of annual sales for resale,
- (3) 500 megawatt hours of annual power exchanges delivered, or
- (4) 500 megawatt hours of annual wheeling for others (deliveries plus Losses).

III. What and Where to Submit

(a) Submit this form electronically through the Form 1 Submission Software and an original and six (6) conformed paper copies, properly filed in and attested, to:

Office of the Secretary Federal Energy Regulatory Commission 888 First Street, NE. Room 1A Washington, DC 20426

Retain one copy of this report for your files.

Include with the original and each conformed paper copy of this form the subscription statement required by 18 C.F.R. 385.2011(c)(5). Paragraph (c)(5) of 18 C.F.R. 385.2011 requires each respondent submitting data electronically to file a subscription stating that the paper copies contain the same information as the electronic filing, that the signer knows the contents of the paper copies and electronic filing, and that the contents as stated in the copies and electronic filing are true to the best knowledge and belief of the signer.

(b) Submit, immediately upon publication, four (4) copies of the Latest annual report to stockholders and any annual financial or statistical report regularly prepared and distributed to bondholders, security analysts, or industry associations. (Do not include monthly and quarterly reports. Indicate by checking the appropriate box on Page 4, List of Schedules, if the reports to stockholders will be submitted or if no annual report to stockholders is prepared.) Mail these reports to:

Chief Accountant Federal Energy Regulatory Commission 888 First Street, NE. Washington, DC 20426

- (c) For the CPA certification, submit with the original submission, or within 30 days after the filing date for this form, a Letter or report (not applicable to respondents classified as Class C or Class D prior to January 1, 1984):
- (i) Attesting to the conformity, in all material aspects, of the below listed (schedules and) pages with the Commission's applicable Uniform Systems of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and
- (ii) Signed by independent certified public accountants or an independent Licensed public accountant certified or Licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 CFR 41.10-41.12 for specific qualifications.)

GENERAL INFORMATION (continued)

III. What and Where to Submit (Continued)

(c) Continued

	Reference
Schedules	Pages
Comparative Balance Sheet	110-113
Statement of Income	114-117
Statement of Retained Earnings	118-119
Statement of Cash Flows	120-121
Notes to Financial Statements	122-123

When accompanying this form, insert the Letter or report immediately following the cover sheet. When submitting after the filing date for this form, send the letter or report to the office of the Secretary at the address indicated at III (a).

Use the following format for the Letter or report unless unusual circumstances or conditions, explained in the Letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

In connection with our regular examination of the financial statements of for the year ended on
which we have reported separately under date of We have also reviewed schedules
of FERC Form No. 1 for the year filed with the Federal Energy Regulatory
Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory
Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review
for this purpose included such tests of the accounting records and such other auditing procedures as we considered
necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases.

State in the letter or report, which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

(d) Federal, State and Local Governments and other authorized users may obtain additional blank copies to meet their requirements free of charge from:

Public Reference and Files Maintenance Branch Federal Energy Regulatory Commission 888 First Street, NE. Room 2A ES-1 Washington, DC 20426 (202) 208-2474

IV. When to Submit

Submit this report form on or before April 30th of the year following the year covered by this report.

V. Where to Send Comments on Public Reporting Burden

The public reporting burden for this collection of information is estimated to average 1,217 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any aspect of this collection of information, including suggestions for reducing this burden, to the Federal Energy Regulatory Commission, 888 First Street N.E., Washington, DC 20426 (Attention: Mr. Michael Miller, CI-1); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if this collection of information does not display a valid control number. (44 U.S.C. 3512(a)).

GENERAL INSTRUCTIONS

- I. Prepare this report in conformity with the Uniform System of Accounts (18 CFR 101) (U.S. of A.). Interpret all accounting words and phrases in accordance with the U.S. of A.
- II. Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting year, and use for statement of income accounts the current year's amounts.
- III. Complete each question fully and accurately, even if it has been answered in a previous annual report. Enter the word "None" where it truly and completely states the fact.
- IV. For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2, 3, and 4.
- V. Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" included in the header of each page is to be completed only for resubmissions (see VII. below). The date of the resubmission must be reported in the header for all form pages, whether or not they are changed from the previous filing.
- VI. Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.
- VII. For any resubmissions, submit the electronic filing using the Form 1 Submission Software and an original and six (6) conformed paper copies of the entire form, as well as the appropriate number of copies of the subscription statement indicated at instruction III (a). Resubmissions must be numbered sequentially on the cover page of the paper copies of the form. In addition, the cover page of each paper copy must indicate that the filing is a resubmission. Send the resubmissions to the address indicated at instruction III (a).
- VIII. Do not make references to reports of previous years or to other reports in lieu of required entries, except as specifically authorized.
- IX. Wherever (schedule) pages refer to figures from a previous year, the figures reported must be based upon those shown by the annual report of the previous year, or an appropriate explanation given as to why the different figures were used.

DEFINITIONS

- I. Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.
- II. Respondent -- The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made.

EXCERPTS FROM THE LAW

Federal Power Act, 16 U.S.C. 791a-825r)

- "Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act, to wit:
 ...(3) "Corporation" means any corporation, joint-stock company, partnership, association, business trust,
 organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of
 the foregoing. It shalt not include 'municipalities, as hereinafter defined;
 - (4) "Person" means an individual or a corporation;
- (5) "Licensee" means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof;
- (7) "Municipality" means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry an the business of developing, transmitting, unitizing, or distributing power;..."
- (11) "Project" means a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or forebay reservoirs directly connected therewith, the primary line or Lines transmitting power therefrom to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;
- "Sec. 4. The Commission is hereby authorized and empowered:
- (a) To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity, development costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."
- "Sec. 304. (a) Every Licensee and every public utility shall file with the Commission such annual and other periodic or special reports as the Commission may be rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission my prescribe the manner and form in which such reports shalt be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of maintenance and operation of the project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies."
- "Sec. 309. The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the form or forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be filed..."

General Penalties

"Sec. 315. (a) Any licensee or public utility which willfully fails, within the time prescribed by the Commission, to comply with any order of the Commission, to file any report required under this Act or any rule or regulation of the Commission thereunder, to submit any information of document required by the Commission in the course of an investigation conducted under this Act ... shall forfeit to the United States an amount not exceeding \$1,000 to be fixed by the Commission after notice and opportunity for hearing..."

- 8. None
- 9. The Arrowhead-Weston line was approved by the Public Service Commission of Wisconsin on August 17, 2001. On November 26, 2002 the company notified the PSCW of an increase in the project cost. In may 2003, the company provided the PSCW with a new project estimate. The PSCW approved the revised cost estimate on December 19, 2003.

The Arpin Substation Benefit Area Joint Operating, Planning and Cost Sharing Agreement ("the Agreement"), was entered into by Northern States Power Company ("NSP"), Marshfield Electric & Water Department ("MEWD"), Wisconsin Public Service Corporation ("WPSC"), Wisconsin Power & Light Company ("WPL") and Wisconsin Electric Power Company ("WE") in 1988. The Agreement provided for an annual payment of \$295,000 from WPL to NSP for use of a 345kv transmission line owned by NSP. This annual payment was shared by WPL, WPSC and MEWD based on distribution load of the entities in the Arpin area. At the time the Company was formed, WPL transferred the Arpin substation to the Company and attempted to assign the Agreement to the Company. Accordingly, WPL has taken the position that the Company should now be responsible for the \$295,000 annual payment. Total charges, including interest, for period 2001 to 2003 would be approximately \$1 million to \$1.5 million. However, the Company disputes the validity of the assignment of the Agreement, as the Agreement requires the written consent of all parties for any assignment, and such consent was never obtained. In addition, the agreement requires the parties to renegotiate the \$295,000 annual payment after ten years (1997). If the parties cannot agree on a new amount, the matter goes to arbitration, with the arbitrator expressly given authority to reestablish the payment back to the ten-year point. The arbitrator is required to take current FERC policy into account in its decision. Current FERC policy likely would not allow the \$295,000 fee. Certain of the parties to the Agreement have indicated they are considering initiating price renegotiation. The Company does not believe that it will ultimately be responsible for the annual payments under the Agreement and has not recorded a liability in its financial statements for any amounts related to the Agreement.

The Company was notified in December 2003 of a dispute filed by another transmission owner regarding the distribution of revenues for certain point-to-point transactions during 2002 and 2003. MISO originally distributed 100% of the revenue, in the amount of \$8.7 million, to the Company, but now asserts that the Company should have only received \$2.3 million. MISO is seeking return of the \$6.4 million. The Company disagrees with MISO's determination and has formally disputed the matter. The Company cannot predict how much, if any, of the disputed amount it will have to refund to MISO; accordingly, no reserve has been recorded in the financial statements.

American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003			
IMPORTANT CHANGES DURING THE YEAR (Continued)						

10. The Company acquired the current project assets associated with the Arrowhead-Weston line project from Wisconsin Public Service Corporation (WPSC) at WPSC's cost of \$20 million on June 13, 2003. WPSC will continue its role as the construction contractor on the Wisconsin portion of the project; however, the Company has assumed primary project management responsibility and will acquire the project facilities from WPSC, at WPSC's cost, on an as-constructed basis.

11. None

NOTES TO FINANCIAL STATEMENTS (Continued)				

American Transmission Company LLC

Notes to Financial Statements December 31, 2003

(1) Nature of Operations and Summary of Significant Accounting Policies

(a) General

American Transmission Company LLC (the Company) was organized on June 12, 2000 as a limited liability company under the Wisconsin Limited Liability Company Act as a single purpose, for-profit electric transmission company. The Company's purpose is to plan, construct, operate, own and maintain electric transmission facilities to provide for an adequate and reliable transmission system that meets the needs of all users on the system and supports equal access to a competitive, wholesale electric energy market. The Company owns and operates the electric transmission system, under the direction of the Midwest Independent Transmission System Operator, Inc. ("MISO"), in parts of Wisconsin, Illinois and the Upper Peninsula of Michigan. The Company is subject to regulation by the Federal Energy Regulatory Commission ("FERC") as to rates, terms of service and financing and by state regulatory commissions as to other aspects of business, including the construction of electric transmission assets.

These financial statements were prepared in accordance with the accounting requirements of the Federal Energy Regulatory Commission, as set forth in its Uniform System of Accounts, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States. The differences between these financial statements and the Company's financial statements prepared in accordance with accounting principles generally accepted in the United States are mainly attributable to the inclusion in these financial statements, as described in notes 1(k) and 6, of state and federal income tax provisions. Certain balance sheet amounts are also classified differently within the Uniform System of Accounts than they would be under accounting principles generally accepted in the United States. Certain prior period amounts have been reclassified to be consistent with the current year presentation.

(b) Corporate Manager

The Company is managed by a corporate manager, ATC Management Inc. ("Management Inc."). The Company and Management Inc. have common ownership and operate as a single functional unit. Under the Company's operating agreement, Management Inc. has complete discretion over the business of the Company and provides all management services to the Company at cost. The Company itself has no employees. The Company's operating agreement establishes that all expenses of Management Inc. are the responsibility of the Company. These expenses consist primarily of payroll, benefits, payroll-related taxes and other employee related expenses. All such expenses are recorded in the Company's

FERC FORM NO. 1 (ED. 12-88	FERC	FORM	NO. 1	(ED.	12-88

American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	S TO FINANCIAL STATEMENTS (Continued)		

accounts as if they were direct expenses of the Company. As of December 31, the following net (receivables from)/payables to Management Inc. were included in the Company's balance sheets:

	2003	2002
Acct 190- Accumulated Deferred Income Taxes	\$(5,675)	\$(4,845)
Acct 228.3- Accumulated Provision for Pensions and Benefits	\$4,442	\$7,988
Acct 234- Accounts Payable to Associated Companies	9,142	4,398
Total Amount Payable to Management Inc.	\$7,909	\$7,541

Amounts included in Account 234 are primarily payroll and benefit related accruals. Amounts included in Account 228.3 relate primarily to certain long-term compensation arrangements covering Management Inc. employees, as described in Note (2). Amounts included in Account 190 are for income taxes paid on Management Inc.'s behalf by the Company. The income taxes are due to timing differences relating to the tax deductibility of certain employee-related costs. As these timing differences reverse in future years, Management Inc. will recover the income taxes paid and repay the advances from the Company.

(c) Revenue Recognition

Wholesale electric transmission service for utilities, municipalities, municipal electric companies, electric cooperatives and other eligible entities is provided through the Company's facilities under the MISO open-access transmission tariff regulated by FERC. The Company charges for these services under FERC approved rates. The tariff specifies the general terms and conditions of service on the transmission system and the approved rates set forth the calculation of the amounts to be paid for those services. The Company's revenues are derived from agreements for the receipt and delivery of electricity at points along the transmission system. The Company does not take ownership of the electricity that it transmits.

The true-up provision in the formula rate tariff meets the requirements of an alternative revenue program set forth in the FASB's Emerging Issues Task Force Issue No. 92-7. Accordingly, revenue is recognized for services provided during the reporting period based on the revenue requirement formula in the tariff. The Company accrues or defers revenues to the extent that the actual revenue requirement for the reporting period is higher or lower, respectively, than the amounts billed during the reporting period. The true-up amount will automatically be reflected in customer bills within two years (see Note 7).

(d) Transmission and General Plant and Related Depreciation

Transmission Plant is recorded at the original cost of construction. Assets transferred to the Company by its members, which include investor-owned utilities, municipalities, municipal electric companies and electric cooperatives, have been recorded at their original cost in property, plant and equipment with the related reserves for accumulated depreciation also recorded.

The original cost of construction includes materials, labor, construction overhead, outside contractor costs and an allowance for funds used during construction. Additions to and significant replacements of transmission assets are charged to property, plant and equipment at cost; replacement of minor items is charged to maintenance expense. The cost of transmission plant, together with removal cost less salvage value, is charged to accumulated depreciation when assets are retired.

Name of Respondent	This Report is:	Date of Report	Year of Report	
,	(1) X An Original	(Mo, Da, Yr)	-	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003	
NOTES	NOTES TO FINANCIAL STATEMENTS (Continued)			

The provision for depreciation of transmission assets is an integral part of the Company's cost of service under FERC-approved rates. Depreciation rates include estimates for future removal costs and salvage value. Depreciation expense as a percentage of average transmission plant was 2.64% in 2003 and 2.65% in 2002. The reserves for accumulated depreciation as of December 31, 2003 and 2002 included approximately \$78 million and \$74 million, respectively, of accrued removal costs.

General plant, which includes buildings, office furniture and equipment, computer hardware and software, is recorded at cost. Depreciation is recorded at straight-line rates over the estimated useful lives of the assets, which range from three to forty years.

(e) Allowance for Funds Used During Construction

Allowance for funds used during construction ("AFUDC") represents the approximate cost of debt used to fund the construction of transmission assets and a return on members' capital devoted to construction. The portion of the allowance that applies to borrowed funds is presented in the statements of operations as a reduction of interest expense; the return on members' capital is presented as other income. Although the allowance does not represent current cash income, it is recovered under the ratemaking process over the service lives of the related assets. In accordance with FERC Order 561, the Company capitalized AFUDC at the following average rates in 2003, 2002 and 2001:

	2003	2002
Debt Rate	3.1%	3.3%
Equity Rate	4.3%	5.1%
Total Rate	7.4%	8.4%

(f) Interconnection Agreements

The Company has entered into a number of interconnection agreements with entities planning to build generation plants within the Company's service territory ("generators"). During construction, the generators will construct the interconnection facilities or finance and bear all financial risk of constructing the interconnection facilities under these agreements. The Company will own and operate the interconnection facilities when the generation plants become operational and will reimburse the generator for construction costs plus interest. If the generation plants do not become operational, the Company has no obligation to reimburse the generator for costs incurred during construction.

Certain of the agreements require the Company to construct the related transmission facilities. In such cases, the Company receives cash advances for construction costs from the generators. During construction, these costs are included in construction work in progress ("CWIP"). Cash advances from the generators, along with accruals for interest, are recorded as liabilities in Account 252, Customer Advances for Construction. Accruals for interest are also capitalized, in lieu of AFUDC, and included in CWIP. At December 31, 2003 and 2002, advances and accrued interest totaled \$28.6 million and \$3.8 million, respectively. Of the advances and interest recorded at December 31, 2003, \$15.8 million was due to be repaid within one year and was recorded in account 242, Miscellaneous Current and Accrued Liabilities.

Name of Respondent	This Report is:	Date of Report	Year of Report
	(1) X An Original	(Mo, Da, Yr)	·
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	S TO FINANCIAL STATEMENTS (Continued)		

(g) Cash and Cash Equivalents

Cash and cash equivalents include highly liquid investments with original maturities of three months or less.

(h) Regulatory Assets

The Company's accounting policies conform to Statement of Financial Accounting Standards No. 71, "Accounting for the Effects of Certain Types of Regulation". Accordingly, assets and liabilities that result from the regulated ratemaking process are recorded that would otherwise not be recorded under accounting principles generally accepted in the United States of America for non-regulated companies. Certain costs and credits are recorded as regulatory assets and liabilities as incurred and are recognized in the statements of operations at the time they are reflected in rates.

As of December 31, the following amounts were recorded in Account 182.3, Other Regulatory Assets (in thousands):

2003	2002
\$7,164	\$10,746
-	5,699
-	(4,838)
2,484	-
\$9,648	\$11,607
	- 2,484

Under the rate settlement agreement (see Note 7) approved by FERC in November 2001, the Company anticipates recovering in rates, over a five-year period, certain start-up and development costs incurred in 2000 and 2001. The Company also earns its allowed rate of return on the unamortized portion of the start-up costs during each year. Accordingly, deferred start-up costs of \$15.1 million are being amortized to expense over a five-year period beginning in 2001. Amortization expense of \$3.6 million is included in 2003 and 2002 in Account 407.3, Regulatory Debits.

As discussed further in Notes 1(c) and 7, the November 2001 rate settlement approved by FERC provides for a true-up mechanism. Under the true-up mechanism, the Company was authorized to include an under-collection of approximately \$5.4 million from 2001, plus interest, in its billings in 2003. During 2002, the Company over-collected approximately \$4.6 million. Under the terms of the tariff, this amount would ordinarily be refunded, with interest, to customers in 2004; however, the Company filed an application with FERC on December 31, 2002, for a one-time amendment to the rates which would allow the Company to accelerate this refund by one year and net it against the 2001 under-collection. FERC approved this amendment on March 6, 2003, and the Company collected the net true-up of \$0.8 million in its monthly billings in 2003.

Under the true-up mechanism, the Company under-collected approximately \$2.5 million during 2003. This amount, plus interest, will be recovered during 2005 through the Company's monthly billings.

The Company continually assesses whether regulatory assets continue to meet the criteria for probability of future recovery. This assessment includes consideration of factors such as changes in the regulatory environment, recent rate orders to other

Name of Respondent	This Report is:	Date of Report	Year of Report
'	(1) X An Original	(Mo, Da, Yr)	·
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTE	S TO FINANCIAL STATEMENTS (Continued)		

regulated entities under the same jurisdiction and the status of any pending or potential deregulation legislation. If future recovery of regulatory assets becomes improbable, the affected assets would be written off in the period in which such determination is made.

(i) Other Assets

As of December 31, other assets were comprised of the following (in thousands):

	2003	2002
Preliminary Survey and Investigation Costs (Acct 183)	\$4,297	\$7,410
Preliminary Survey and Investigation Costs (Acct 183) Jnamortized Debt Issuance Costs (Acct 181)	4,065	3,539
	\$8,362	\$10,949

Preliminary survey and investigation costs relate to study and planning costs in the early stages of construction projects. Costs directly attributable to the construction of transmission assets are capitalized as other assets until all required regulatory approvals are obtained and construction begins, at which time the costs are transferred to construction work in progress.

(i) Impairment of Long-lived Assets

The Company reviews the carrying values of long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying values may not be recoverable. Impairment would be determined based upon a comparison of the undiscounted future operating cash flows to be generated during the remaining life of the assets to their carrying values. An impairment loss would be measured by the amount that an asset's carrying amount exceeds its fair value. As long as its assets continue to be recovered through the rate-making process, the Company believes that such impairment is unlikely.

(k) Income Taxes

The Company is a limited liability company that has elected to be treated as a partnership under the Internal Revenue Code and applicable state statutes. As such, it is not liable for federal or state income taxes. The Company's members (except certain tax exempt members) report their share of the Company's earnings, gains, losses, deductions and tax credits on their respective federal and state income tax returns. Accordingly, under accounting principles generally accepted in the United States of America, the Company would not record an income tax provision.

However, the Company is allowed to recover in rates, as a component of its cost of service, the amount of income taxes that are the responsibility of its members. As such, the Company has included a provision for its members' federal and state income tax expenses, deferred taxes, excess deferred taxes and deferred investment tax credits in the income statement, balance sheet and statement of cash flows in this annual report. Approximately 10% of the membership units outstanding during the year were held by members that pay no income tax on their share of the Company's taxable income. Accordingly, the income tax expense in this report does not include amounts attributable to those members' share of income, expense or tax credits. The company makes quarterly earnings distributions to its members in amounts that are sufficient to satisfy their current income tax obligations. As such, no current income tax liability is included in the balance sheet at year end. All

Name of Respondent	This Report is:	Date of Report	Year of Report
·	(1) X An Original	(Mo, Da, Yr)	·
American Transmission Company LLC	(2) A Resubmission	04/01/2004	Dec 31, 2003
NOTES	S TO FINANCIAL STATEMENTS (Continued)		

distributions to members, including amounts to satisfy current income tax obligations, are reflected in the statement of cash flows as cash flows from financing activities. Income tax expense is shown as an adjustment to cash flows from operating activities.

The income tax expense included in this report is derived using the liability method as prescribed by Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes." Under this method, deferred income taxes have been recorded using currently enacted tax rates for the differences between the members' tax basis of the Company's assets and liabilities and the basis reported in the financial statements. Investment tax credits related to contributed property have been recorded as deferred credits and are being amortized to income tax expense over the service lives of the property.

As noted in 1(b), the Company and Management Inc. have common ownership and operate as a single functional unit. The Company's operating agreement also establishes that all expenses of Management Inc. are the responsibility of the Company. Accordingly, income tax expense in this report includes amounts related to Management Inc.

(I) Use of Estimates

The preparation of financial statements in accordance with the uniform system of accounts requires management to apply policies and make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates are used for items such as depreciable lives of property, removal costs and salvage associated with asset retirements, tax provisions included in rates, actuarially determined benefit costs and accruals for construction costs and operations and maintenance expenses. As additional information becomes available, or actual amounts are determined, the recorded estimates are revised. Consequently, operating results can be affected by revisions to prior accounting estimates.

(m) New Accounting Pronouncements

In June 2001, the FASB issued SFAS No. 143, "Accounting for Asset Retirement Obligations", that applies to all companies. SFAS No. 143 provides accounting requirements for retirement obligations associated with tangible, long-lived assets. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which there is a legal obligation to settle under existing or enacted law, statute, written or oral contract, or by legal construction under the doctrine of promissory estoppel. SFAS No. 143 is effective for fiscal years beginning after June 15, 2002. The Company has concluded that it does not have significant asset retirement obligations and therefore did not record any obligation when the statement was adopted on January 1, 2003. However, through the rate-making process, the Company collects removal costs through its depreciation rates for certain assets that do not have legal asset retirement obligations (see Note 1(d)).

In January 2003, the FASB issued Financial Interpretation No. (FIN) 46, "Consolidation of Variable Interest Entities". This interpretation of Accounting Research Bulletin No. 51, "Consolidated Financial Statements", addresses consolidation by business enterprises of variable interest entities. The Company has no association with any variable interest entities that would require the Company to consolidate another entity.

NOTES	TO FINANCIAL STATEMENTS (Continued)		

In December 2003, the FASB issued SFAS No. 132," Employers' Disclosures about Pensions and Other Postretirement Benefits". This statement revises employers' disclosures about pension plans and other postretirement benefit plans to present more information about the economic resources and obligations of such plans. The statement is effective for non-public companies for fiscal years ending after June 15, 2004. The Company will adopt this statement as of the effective date. The Company does not anticipate the statement will have a material affect on the Company's financial position or results of operations.

(2) Benefits

Management Inc. provides certain postretirement health care benefits to employees. The weighted average assumptions as of the measurement date of October 1 are as follows:

	2003	2002
Discount Rate	6.25%	6.75%
Medical Cost Trend:		
Initial Range	11.00%	18.00%
Ultimate Range	5.00%	5.50%

The components of Management Inc.'s postretirement benefits expense for 2003 and 2002 are as follows (in thousands):

	2003	2002
Service Cost	\$934	\$658
Interest Cost	413	292
Amortization of Prior Service Cost	250	250
Net Actuarial Loss	60	-
Net Periodic Postretirement Cost	\$1,657	\$1,200

The assumed medical trend rates are critical assumptions in determining the service and interest cost and accumulated postretirement benefit obligation related to postretirement benefit costs. A one percent change in the medical trend rates for 2003, holding all other assumptions constant, would have the following effects (in thousands):

	One Percent Increase	One Percent Decrease
Effect on Total of Service and Interest Cost Components	\$362,238	\$(275,471)
Effect on Postretirement Benefit Obligation at the End of Year	1,372,919	(1,077,200)

Name of Respondent	This Report is:	Date of Report	Year of Report
·	(1) X An Original	(Mo, Da, Yr)	·
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES TO FINANCIAL STATEMENTS (Continued)			

A reconciliation of the change in the benefit obligation during 2003 and 2002 is as follows (in thousands):

	2003	2002
Accumulated Postretirement Benefit Obligation		
at the Beginning of Year	\$7,940	\$4,168
Service Cost	934	658
Interest Cost	413	292
Actuarial (Gains)/Losses	(3,029)	2,822
Benefit Obligation at End of Year	\$6,258	\$7,940

Claims paid during 2003 and 2002 were not significant.

In December 2003, Management Inc. established a Voluntary Employee Benefit Association ("VEBA") trust and a 401(h) trust that will be funded as the Company recognizes post-retirement health obligations. On December 30, 2003, the Company transferred \$3.9 million in cash as an initial funding of the VEBA. No amounts were contributed to the 401(h) trust in 2003. The long-term investment objectives of the trusts are to preserve and, if possible, enhance the post-inflation value of the trust's assets, subject to cash flow requirements, while maintaining an acceptable level of volatility.

A reconciliation of the funded status of the plan to the amounts recognized by the Company as long-term liabilities (payable to Management Inc.) in the December 31, 2003 and 2002 balance sheet is as follows (in thousands):

	2003	2002
Funded Status as of December 31	\$(2,385)	\$(7,940)
Unrecognized Prior Service Cost	2,252	2,502
Unrecognized Net Actuarial Loss	120	3,209
Net Amount Recognized as of December 31	\$(13)	\$(2,229)

On December 8, 2003, the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law. The Act introduced a prescription drug benefit program under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree health care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D.

The FASB issued FASB Staff Position (FSP) No. 106-1 that allows sponsors to elect to defer recognition of the effects of the Act. In accordance with FSP 106-1, the Company has elected to defer recognition of the effects of the Act. Accordingly, any measures of the net periodic postretirement benefit cost in the financial statements or the accompanying notes do not reflect the effects of the Act on the plan, as the Company has not determined the effect on the Plan. Specific authoritative guidance on the accounting for the federal subsidy is pending and that guidance, when issued, could require the Company to change previously reported information.

Name of Respondent	This Report is:	Date of Report	Year of Report
	(1) X An Original	(Mo, Da, Yr)	·
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES TO FINANCIAL STATEMENTS (Continued)			

Management Inc. sponsors a defined contribution money-purchase pension plan, in which substantially all employees participate, and makes contributions to the plan for each participant based on several factors. Contributions made by Management Inc. to the plan totaled \$1.6 million in 2003 and \$1.4 million in 2002.

Certain management employees who agreed to leave their prior employers and become employees of Management Inc. receive pension benefits from Management Inc. which are at least equal to the benefits the employees would have received under the pension plans of their prior employers. The Company accounts for the benefits as deferred compensation arrangements under APB 12 "Omnibus Opinion". As of December 31, 2003 and 2002, \$1.3 million and \$.9 million, respectively, was included in Account 228.3, Accumulated Provision for Pensions and Benefits, related to this plan.

Management Inc. also provides a deferred compensation plan for certain employees. The plan allows for the elective deferral of a portion of an employee's base salary and incentive compensation and also contains a supplemental retirement and 401(k) component. As of December 31, 2003 and 2002, \$3.1 million and \$2.2 million, respectively, was included in Account 228.3, Accumulated Provision for Pensions and Benefits, related to this deferred compensation plan. Amounts charged to expense, including interest accruals, in 2003 and 2002 were \$.9 million and \$.9 million, respectively.

(3) Members' Equity

The Company's members include investor-owned utilities, municipalities, municipal electric companies and electric cooperatives. Each member was issued membership interests in proportion to the value of transmission assets and/or cash it contributed to the Company.

Distribution of earnings to members is at the discretion of the corporate manager. The operating agreement of the Company established a target for distribution of 80% of annual earnings. During 2003, 2002 and 2001, the Company distributed \$47.9 million, \$48.2 million and \$27.2 million, respectively, of its earnings to its members in proportion to each member's ownership interest in the Company. A distribution of earnings for the fourth quarter of 2003, in the amount of \$12.7 million, was approved by the board of directors on January 29, 2004, bringing the total distributions for 2003 to 80% of earnings.

(4) Debt

(a) Credit Facilities

On June 28, 2002, the Company entered into a syndicated, 364 day, revolving credit facility that allows the Company to borrow up to an aggregate \$75 million from certain financial institutions. The Company may request that the aggregate commitment be increased to up to \$100 million either by increasing the commitment of an existing lender or by adding additional lenders. The credit facility provides backup liquidity to the Company's \$100 million commercial paper program. Interest rates on any outstanding borrowings under the facility are based on either a LIBOR rate plus a margin or an Alternate Base Rate plus a margin. The applicable margin is based on the Company's debt rating from Moody's and S&P and ranges from 0.35% to 1.25%.

Name of Respondent	This Report is:	Date of Report	Year of Report
,	(1) X An Original	(Mo, Da, Yr)	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES TO FINANCIAL STATEMENTS (Continued)			

On June 27, 2003, the Company renewed its 364-day, revolving credit facility on similar terms.

The credit facility contains restrictive covenants, including restrictions on liens, certain mergers, sales of assets, acquisitions, investments, transactions with affiliates, conduct of business, certain financial ratios and requires certain financial reporting. The credit facility also provides for certain customary events of default.

The Company had no borrowing outstanding under the credit facility as of December 31, 2003 and 2002.

(b) Commercial Paper

The Company and certain dealers closed on a \$100 million unsecured, private placement, commercial paper program on August 29, 2001. Investors are limited to qualified institutional buyers and institutional accredited investors. Maturities may be up to 364 days from date of issue, with proceeds to be used for working capital and other capital expenditures. Pricing is par less a discount or, if interest bearing, at par. The Company did not have any borrowing under the commercial paper program as of December 31, 2003 and 2002.

(c) Long-term Debt

The following table summarizes the Company's commitments relating to debt as of December 31, (in thousands)

	2003	2002
Senior Notes at stated rate of 7.125%, due march 15, 2011	\$ 300,000	\$ 300,000
Discount	(1,785)	(1,967)
	298,215	298,033
Senior Notes at stated rate of 7.02%, due August 31, 2032 Senior Notes at stated rate of 6.79%, due on dates ranging	50,000	50,000
from August 31, 2024 to August 31, 2043	100,000	-
Net Long-term Debt	\$ 448,215	\$ 348,033

The notes rank equivalent in right of payment with all of the Company's existing and future unsubordinated, unsecured indebtedness and senior in right of payment to all subordinated indebtedness of the Company.

The senior notes contain restrictive covenants, which include restrictions on liens, certain mergers and sales of assets and require certain financial reporting. The notes also provide for certain customary events of default. No principal amounts of the senior notes become due in the next five years.

The notes contain an optional redemption provision whereby the Company is required to make the note holders whole on any

Name of Respondent	This Report is:	Date of Report	Year of Report
·	(1) X An Original	(Mo, Da, Yr)	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES TO FINANCIAL STATEMENTS (Continued)			

redemption prior to maturity. The notes may be redeemed at any time, at a redemption price equal to the greater of one hundred percent of the principal amount of the notes plus any accrued interest or the present value of the remaining scheduled payments of principal and interest from the redemption date to the maturity date discounted to the redemption date on a semi-annual basis at the then existing treasury rate plus 30 basis points, plus any accrued interest.

(5) Fair Value of Financial Instruments

The carrying amount and estimated fair value of the Company's long-term debt at December 31 are as follows (in millions):

	2003	2002
Carrying amount	\$448.2	\$ 348.0
Estimated fair value	\$500.2	\$ 395.6

The carrying amount of the Company's financial instruments included in current assets and current liabilities approximates fair value due to the short maturity of such financial instruments. The fair value of the Company's long-term debt is estimated based upon quoted market value for the same or similar issues or upon the quoted market prices of U.S. Treasury issues having a similar term to maturity, adjusted for the Company's bond rating.

(6) Income Taxes

The Company is a limited liability company that has elected to be treated as a partnership under the Internal Revenue Code and applicable state statutes. As such, it is not liable for federal or state income taxes. However, the Company is allowed to recover in rates, as a component of its cost of service, the amount of income taxes that are the responsibility of its members. Accordingly, the Company includes a provision for its members' federal and state current and deferred income tax expenses and amortization of the excess deferred tax reserves and deferred investment tax credits associated with assets transferred to the Company by its members in its regulatory financial reports and rate filings. For purposes of determining the Company's revenue requirement under FERC-approved rates, rate base is reduced by an amount equivalent to average net accumulated deferred taxes, including excess deferred tax reserves. Such amounts were approximately \$72.2 million and \$67.7 million in 2003 and 2002, respectively, and are primarily related to accelerated depreciation and other plant-related differences. 2003 and 2002 revenues include recovery of \$20.9 million and \$17.4 million, respectively, of income tax expense.

The income tax provision for the years ended December 30 consisted of the following (in thousands):

	2003	2002
Current Taxes		
Federal	\$2,480	\$12,639
State	3,271	3,853
Deferred Taxes	15,505	1,649
Amortization of deferred investment tax credits	(512)	(655)
	\$20,744	\$17,486

Name of Respondent	This Report is:	Date of Report	Year of Report	
	(1) X An Original	(Mo, Da, Yr)		
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003	
NOTES TO FINANCIAL STATEMENTS (Continued)				

A reconciliation of income tax at the federal statutory rate to tax expense is as follows (in thousands):

	2003	2002
Tax at federal statutory rate	\$21,947	\$18,926
State tax, net of federal benefit	2,525	2,256
Equity AFUDC	(756)	(586)
Amortization of deferred investment tax credits	(512)	(655)
Reversal of excess deferred federal income tax	(540)	(705)
Other permanent differences	138	231
Adjustment for tax exempt members	(2,058)	(1,981)
	\$20,744	\$17,486

A reconciliation of income tax expense to income taxes recovered in rates is as follows (in thousands):

	2003	2002
Income tax expense Difference in tax benefit for debt component of	\$20,744	\$17,486
return on rate base and tax benefit for interest expense	307	135
Impact of other non-operating income/expense	(167)	(206)
Income taxes recovered in rates	\$20,884	\$ 17,415

The Internal Revenue Service contacted the Company in January 2004 to schedule an examination of its 2001 federal income tax return. This will be the Company's first tax examination since it commenced operations. Any adjustments that might result from the examination could impact the Company's income tax provision in a future period.

(7) Regulatory Proceedings

In December of 2000, the Company filed a rate proceeding with FERC to supersede the original formula rates included as part of the open-access transmission tariff filed in July of 2000. On December 29, 2000, FERC accepted the Company's proposed rates, subject to refund and future hearings. As of January 1, 2001, the Company began collecting revenues under the proposed rates. In March 2001, the Company filed revised rates with FERC. The proposed rates were accepted and consolidated with the previous rate filing, subject to refund and future hearings. The Company began collecting revenues under the new rates on June 1, 2001. The proposed revisions modified the rate from a formula based on historical costs to a formula based on projected costs, subject to an annual true-up for the billing period.

FERC	FORM N	IO. 1	(ED.	12-88)
------	--------	-------	------	--------

Name of Respondent	This Report is:	Date of Report	Year of Report
·	(1) X An Original	(Mo, Da, Yr)	·
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	TO FINANCIAL STATEMENTS (Continued)		

In August 2001, the Company filed comprehensive settlement proposals with FERC that resolved all outstanding rate issues. The proposed settlements were certified by the presiding Administrative Law Judge of FERC in October 2001 and an order approving the settlements was issued by FERC in November 2001. Due to the transfer of tariff administration to MISO, described in Note 8(c), the Company's approved rates have been incorporated in Attachment O of the MISO tariff. The settlement rates included an annual true-up mechanism, whereby the Company must adjust its revenue requirement in the second year following the reporting year by the difference between the Company's actual cost of service plus allowed return for the reporting year and the amounts actually billed in the reporting year. As a result of applying the true-up mechanism for 2001, the Company determined that amounts billed to customers in 2001 were approximately \$5.4 million less than its actual cost of service plus allowed return. Accordingly, the Company recorded this amount as a regulatory asset as of December 31, 2001. In 2002, the Company had determined that amounts billed to customers were approximately \$4.6 million more than its actual cost of service plus allowed return. Under the terms of the tariff, this amount would ordinarily be refunded, with interest, to customers in 2004; however, the Company filed an application with FERC on December 31, 2002, for a one-time amendment to its rates which would allow the Company to accelerate this refund by one year and net it against the 2001 under-collection. FERC approved this amendment on March 6, 2003, and the Company collected the net true-up of \$0.8 million in its monthly billing in 2003. Under the true-up provision, the Company under-collected approximately \$2.5 million during 2003. This under-collection will be recovered through monthly billings in 2005.

On October 30, 2003, the Company filed an application with FERC for approval to modify its rate formula in Attachment O of the MISO Open Access Transmission Tariff. The Company is seeking authorization to make the following modifications to the rate formula:

- a) Include Construction Work in Progress for new transmission investment in rate base to earn a current return in lieu of capitalizing an Allowance for Funds Used During Construction.
- b) Allow current year expensing of preliminary survey and investigation costs for new transmission investment. Such costs are currently capitalized as a component of the associated transmission assets' cost and recovered, with a return on investment, over the life of the asset.
- c) Increase the allowed return on equity from the current 12.20% to 12.38% to correspond to the rate FERC has allowed for other MISO transmission owners and return to a 50% debt, 50% equity capital structure.

On December 29, 2003, FERC issued an order that conditionally accepted for filing and nominally suspended the Company's proposed modifications, to become effective January 1, 2004, subject to refund. The order also established hearing and settlement judge procedures. Based on concerns raised by intervenors in the case, several issues were set for hearing, including the proposed capital structure and the rate impact of expensing preliminary survey and investigation costs for certain transmission projects. A hearing on these issues is being held in abeyance to give the Company and the intervenors an opportunity to reach a settlement. The Company anticipates, based on the current state of settlement discussions, that it will be able to reach a settlement on the issues set for hearing.

Name of Respondent	This Report is:	Date of Report	Year of Report
	(1) X An Original	(Mo, Da, Yr)	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	S TO FINANCIAL STATEMENTS (Continued)		

(8) Commitments and Contingencies

(a) Operating Leases

The Company leases office space under non-cancelable operating leases. Amounts incurred during 2003 and 2002 totaled approximately \$1.3 million and \$1.0 million, respectively.

Future minimum lease payments, which will be expensed as incurred, under non-cancelable operating leases are as follows for the years ending December 31 (in thousands):

2004	\$1,417
2005	1,411
2006	1,340
2007	1,284
2008	356
Thereafter	
	\$5,808

(b) Transfer of Operational Control of Transmission System

In compliance with Wisconsin statutes and FERC requirements, operational control of the Company's transmission system was transferred to MISO, a FERC-approved regional transmission organization (RTO), effective February 1, 2002.

MISO has operational control over the Company's system and has the authority to direct the manner in which the Company performs operations. The Company is also required to seek direction from MISO for certain operational actions the Company seeks to perform within its system. MISO is responsible for monitoring congestion, directing the associated operations to overcome congestion, approving transmission maintenance outages, as well as negotiating with generators on the timing of generator maintenance outages within the entire MISO system, including that portion representing the Company's system. The Company may be required to coordinate planning activities for new projects or system upgrades with MISO. Certain projects might require review by MISO before implementation.

(c) Transfer of Tariff Administration Responsibilities

In accordance with FERC Order 2000, MISO has become the tariff administrator for all of its transmission-owning members. MISO and the Company made a joint Section 205 filing with FERC that created an ATC pricing zone within MISO's tariff. This filing, which was accepted by FERC on February 11, 2002, reflected the terms and conditions of the Company's settlement agreement approved by FERC on November 7, 2001. As of February 1, 2002, the Company's rates for service are now administered under MISO's tariff. The Company will continue to file with FERC for approval of future changes to the formula that determines its revenue requirements.

	(1) X An Original	(Mo, Da, Yr)	-
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	TO FINANCIAL STATEMENTS (Continued)		

(d) Regulatory Changes that may Affect the Company's Future Responsibilities and Relationship with MISO

On July 31, 2002, FERC issued a Notice of Proposed Rulemaking ("NOPR") entitled "Remedying Undue Discrimination Through Open-Access Transmission Service and Standard Electricity Market Design" that may ultimately lead to a final rule and future orders that will likely make changes to the Company's current tariff and rates for service. Future orders may also modify the Company's functional responsibilities in areas such as expansion planning, performing facilities and system impact studies, building new facilities, reliability management, congestion management and regional coordination.

Comments on the NOPR were due to FERC in mid-November 2002 and in mid-January 2003. FERC issued a white paper and appendix on April 28, 2003 that reflected extensive comments received from utilities, state regulatory agencies and other interested parties. The timing of the final rule is uncertain at this time. Additionally, there are components of proposed energy legislation before the U.S. Congress that would prevent FERC from issuing any further orders related to Standard Market Design until 2005 or later.

The white paper and appendix contain provisions related to the allocation and characteristics of financial transmission rights ("FTRs"). The impact of these provisions on the Company is uncertain. The current tariff does not specify if revenue shortfalls associated with FTRs are subject to the true-up mechanism or if earnings are at risk due to the volatility of FTR revenues. On July 25, 2003, MISO filed a draft Transmission and Energy Markets Tariff ("TEMT") for implementation of its market design, which included provisions that would protect transmission owners from shortfalls in revenue related to FTRs. MISO subsequently announced in October that it would withdraw its original proposal and place primary focus on improving the reliability of the transmission grid. MISO's revised proposal would delay implementation of its market design until December 2004. Due to the uncertainty of how the current true-up mechanism will be applied, if the TEMT is not approved at such time as it is re-filed by MISO, the effort by FERC on standard market design could affect earnings and cash flows if adopted as proposed. At this time, the Company cannot predict whether the white paper and appendix will be promulgated as proposed. Future actions taken by Congress could affect the timing and substantive content of Standard Market Design.

In July 2003, the Wisconsin legislature enacted new legislation that modified the Company's statutory requirement to remain a member of MISO. Upon action by the Public Service Commission of Wisconsin ("PSCW"), the Company may be allowed to exit MISO. Should the Company be allowed to leave MISO, it may have liability for a portion of the deferred costs MISO has incurred for start-up and operations. The Company has no current plans to exit MISO. However, there is ongoing uncertainty about other transmission owners continuing their membership in MISO; this uncertainty raises the risk that MISO could become nonviable at some point in the future. The impact on the Company if this would occur is uncertain at this time.

On July 23, 2003, FERC issued an order eliminating the Regional Through and Out Rates ("RTOR") for point-to-point transmission services between MISO and the PJM Interconnection, effective October 31, 2003. On November 13, 2003, FERC delayed the effective date until April 1, 2004. RTOR revenues are collected by MISO and distributed to its member transmission owners. The Company currently receives approximately \$3.2 million per year in RTOR revenues from MISO, which serves as a reduction in the amount of the Company's revenue requirement that is borne by its network transmission customers. A transitional revenue replacement mechanism, called the Seams Elimination Cost Assignment ("SECA"), is expected to be in place from April 1, 2004 through March 31, 2006. The purpose of the SECA is to protect the financial position of the transmission owners by preserving their revenue stream during the transition period, after which this revenue source will be permanently eliminated. Due to the nature of the Company's revenue requirement formula, including the true-up mechanism described above, management does not expect the elimination of RTOR revenues to have a significant

Name of Respondent	This Report is:	Date of Report	Year of Report
· ·	(1) X An Original	(Mo, Da, Yr)	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTE	S TO FINANCIAL STATEMENTS (Continued)		

impact on the Company's results of operations. The Company expects that any revenue shortfall associated with the SECA will be made up by the true-up mechanism during the transition period. Similarly, after the transition period, the elimination of RTOR revenues will result in an increase in the revenues collected from the Company's network transmission customers.

(e) MISO Point-to-Point Revenue Dispute

In December 2003, MISO notified the Company of a dispute filed by another transmission owner regarding the distribution of revenues for certain point-to-point transactions during 2002 and 2003. MISO had originally distributed 100% of the revenue, in the amount of \$8.7 million, related to these transactions to the Company, but now asserts that the Company should only have received a portion of the revenue, in the amount of \$2.3 million. MISO is seeking return of the remaining \$6.4 million. The Company disagrees with MISO's determination and plans to formally dispute the matter. The Company cannot predict how much, if any, of the disputed amount it will ultimately have to refund to MISO; accordingly, no reserve has been recorded in the Company's financial statements at this time. Any amount that the Company would refund to MISO would reduce the revenue credits for point-to-point receipts in the Company's revenue requirement calculation and should be recovered as part of the revenue true-up for the year in which such refund is made. As such, the Company does not expect this matter to materially impact its results of operations.

(f) Arrowhead to Weston Line Project

The Arrowhead to Weston Line Project ("Project") is a transmission line construction project originally sponsored by Wisconsin Public Service Corporation ("WPSC") and Minnesota Power, Inc. ("Minnesota Power") under which a new high voltage 345kv electric transmission line would be built from the vicinity of Duluth, Minnesota to the vicinity of Wausau, Wisconsin. The Project was originally approved, at an estimated total cost of \$165 million, by the PSCW on August 17, 2001. The original approval required that the PSCW be notified of any change greater than 10% of the approved cost estimate of \$165 million. Management, along with WPSC and Minnesota Power, reviewed the Project's original cost estimate and notified the PSCW in November 2002 that there would be a cost increase. In May 2003, the Company provided the PSCW with a new project estimate of \$420 million. The PSCW approved the revised cost estimate on December 19, 2003.

In addition to the PSCW approval, the Project requires permits from the Wisconsin Department of Natural Resources, the National Park Service and the Army Corps of Engineers. Permission is also required from several county governments for the line to cross their property. The Company expects to obtain the necessary permits during 2004 and begin construction on the Wisconsin portion of the line in early 2005. No additional approvals for the Minnesota portion of the line are required and construction will begin in 2004.

The Company acquired the current Project assets from WPSC at WPSC's cost of \$20 million on June 13, 2003. WPSC will continue its role as the construction contractor on the Wisconsin portion of the Project; however, the Company has assumed primary project management responsibility and will acquire the Project facilities from WPSC, at WPSC's cost, on an as-constructed basis.

The Company has reached agreement in principle with Minnesota Power to acquire its interest in the Minnesota portion of the

Name of Respondent	This Report is:	Date of Report	Year of Report
	(1) X An Original	(Mo, Da, Yr)	,
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	S TO FINANCIAL STATEMENTS (Continued)		

Project. It is the Company's intent to finalize the agreement under which the Company will assume approximately \$2.6 million of project costs from Minnesota Power, assume primary project management responsibility and acquire the Project facilities, at Minnesota Power's cost, on an as-constructed basis. Minnesota Power would continue its role as construction contractor. The proposed agreement may require regulatory approvals.

As of December 31, 2003, the Company has accumulated approximately \$29.4 million of costs associated with the Project, including the \$20 million acquired from WPSC. To the extent the appropriate regulatory approvals related to the Project are obtained and the transmission line is constructed and placed in service, these costs, as well as the \$2.6 million from Minnesota Power, will be included in the Company's rate base or otherwise recovered in rates. In the event the line is not approved or not constructed, the Company would seek recovery of all costs it has incurred related to the Project, including costs assumed from WPSC and Minnesota Power. If recovery is not permitted, such costs will be charged to expense.

(g) Interconnection Agreements

The Company has entered into a number of interconnection agreements with entities planning to build generation plants within the Company's service territory. During construction, the generators will construct the interconnection facilities or finance and bear all financial risk of constructing the interconnection facilities under these agreements. The Company will own and operate the interconnection facilities when the generation plants become operational and will reimburse the generator for construction costs plus interest. If the generation plants do not become operational, the Company has no obligation to reimburse the generator for costs incurred during construction.

The current estimate of the Company's commitment, if the generation plants become operational, under these agreements is approximately \$326 million with the expected completion dates ranging from 2004 to 2012. In addition, there may be transmission service requests that require the Company to construct additional, or modify existing, transmission facilities to accommodate such requests. Whether such additions or upgrades to the Company's transmission system are required depends on the state of the transmission system at the time the transmission service is required.

On July 23, 2003, FERC issued Order 2003, which adopted new rules relating to generator interconnections. While the rules incorporate a number of changes to interconnection procedures and standardize the interconnection agreements, with some regional transmission organization flexibility, the rules preserve the responsibility of generators to pay the costs associated with interconnecting any generator to the Company's system, with the right to be reimbursed either in cash or through transmission service credits. Under certain circumstances, the rules increase the generators' responsibility to fund a greater range of transmission improvement costs, depending on the type of interconnection service the generators request. The Company believes that any such costs borne by the Company to upgrade or add to the transmission system to fulfill transmission service requests will be recovered in future rates.

(h) Arpin Agreement Dispute

The Arpin Substation Benefit Area Joint Operating, Planning and Cost Sharing Agreement ("the Agreement"), was entered into by Northern States Power Company ("NSP"), Marshfield Electric & Water Department ("MEWD"), Wisconsin Public Service Corporation ("WPSC"), Wisconsin Power & Light Company ("WPL") and Wisconsin Electric Power Company ("WE")

Name of Respondent	This Report is:	Date of Report	Year of Report
·	(1) X An Original	(Mo, Da, Yr)	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES	TO FINANCIAL STATEMENTS (Continued)		

in 1988. The Agreement provided for an annual payment of \$295,000 from WPL to NSP for use of a 345kv transmission line owned by NSP. This annual payment was shared by WPL, WPSC and MEWD based on distribution load of the entities in the Arpin area. At the time the Company was formed, WPL transferred the Arpin substation to the Company and attempted to assign the Agreement to the Company. Accordingly, WPL has taken the position that the Company should now be responsible for the \$295,000 annual payment. Total charges, including interest, for the period 2001 to 2003 would be approximately \$1 million to \$1.5 million. However, the Company disputes the validity of the assignment of the Agreement, as the Agreement requires the written consent of all parties for any assignment, and such consent was never obtained. In addition, the agreement requires the parties to renegotiate the \$295,000 annual payment after ten years (1997). If the parties cannot agree on a new amount, the matter goes to arbitration, with the arbitrator expressly given authority to reestablish the payment back to the ten-year point. The arbitrator is required to take current FERC policy into account in its decision. Current FERC policy likely would not allow the \$295,000 fee. Certain of the parties to the Agreement have indicated they are considering initiating price renegotiation. The Company does not believe that it will ultimately be responsible for the annual payments under the Agreement and has not recorded a liability in its financial statements for any amounts related to the Agreement.

(i) Potential Adverse Legal Proceedings

The Company may, in the future, become party to lawsuits, including certain suits that may involve claims for which it may not have sufficient insurance coverage. Such litigation could include suppliers and purchasers of energy transmitted by the Company and others with whom the Company conducts business. Effective August 5, 2002, FERC authorized a revision to the MISO tariff that may limit the Company's liability for interruptions in service to only direct charges.

(9) Related Party Transactions

(a) Asset Transfers and Membership Interests

On January 1, 2001, Wisconsin Electric Power Company, Edison Sault Electric Company, Wisconsin Power & Light Company, South Beloit Water, Gas & Electric Company, Wisconsin Public Service Corporation and Madison Gas and Electric Company (together "the contributing utilities") transferred transmission assets with a net book value of \$554.5 million to the Company in exchange for equity interests in the Company. In addition, Wisconsin Public Power, Inc. and Management Inc. contributed cash of \$16.9 million and \$95,000, respectively, in exchange for equity interests in the Company. On April 2, 2001, \$186.1 million of the initial membership interests of the Company were redeemed for cash.

On June 25, 2001, thirteen municipalities transferred transmission assets with net book values of \$10.2 million and cash in the amount of \$5.3 million to the Company in exchange for equity interests in the Company. On June 29, 2001, four electric cooperatives and Upper Peninsula Power Company ("UPPCo") transferred transmission assets with a net book value of \$27.5 million and cash in the amount of \$2.1 million to the Company in exchange for equity interests in the Company. Also on June 29, 2001, an additional \$73.8 million of the initial ownership interests of the contributing utilities, municipalities, and cooperatives were redeemed for cash.

<u>'</u>	(1) X An Original	(Mo, Da, Yr)	
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
NOTES TO	O FINANCIAL STATEMENTS (Continued)		

The original asset contribution agreement contained a provision under which WPSC would retain and complete certain construction projects. Upon completion, the assets would be contributed to the Company for additional equity interests. WPSC transferred such projects to the Company in the amount of \$1.0 million in October 2002, \$0.4 million in January 2003 and \$5.8 million in December 2003.

On June 13, 2003, the Company acquired the Arrowhead to Weston Project assets from WPSC, at WPSC's cost of \$20 million, in exchange for cash. As part of the agreement to transfer the Project, WPSC agreed to provide equity financing of 50% of the costs of the Project. During 2003, WPSC has contributed \$13.5 million in cash, in exchange for additional equity interests in the Company, related to its financing of the Project.

During June 2003, Badger Power Marketing Authority transferred approximately \$.9 million of transmission assets to the Company in exchange for an additional equity interest in the Company.

On December 31, 2003, Upper Peninsula Public Power Agency transferred \$.8 million of transmission assets and \$1.5 million of cash to the Company in exchange for an equity interest in the Company.

(b) Operations & Maintenance and Transitional Services Agreements

During 2003 and 2002, the Company operated under transitional services and operations and maintenance agreements whereby the contributing utilities, municipalities and cooperatives are required to provide certain administrative, operational, maintenance and construction services to the Company at a fully allocated cost, including direct cost, overheads, depreciation and return on assets employed in the services provided to the Company.

Additionally, the Company is obligated to pay each utility a minimum of 85% of the expenses previously incurred by the utility for such activities in a representative year. The amount paid exceeded the minimum in 2003 and 2002. One of the contributing utilities signed a new operations and maintenance agreement during the fourth quarter of 2003 extending these services through 2008. The new agreement does not contain the 85% clause. All other operations and maintenance agreements were automatically extended through 2004. The Company plans to renegotiate its operations and maintenance agreements. In the event that the Company is not able to renew these agreements at the end of their current terms, the Company cannot guarantee that it will be able to procure similar services at similar costs. The Company believes that the costs the Company must incur to provide transmission service will be recoverable in future rates. The terms of these agreements, including pricing, are subject to oversight by the PSCW and the Illinois Commerce Commission.

Beginning June 25, 2001 and June 29, 2001, respectively, some of the contributing municipalities and contributing cooperatives and UPPCO were also obligated to provide to the Company, at cost, for a period of three years, operation and maintenance services on the transmission facilities they had transferred to the Company. The terms of the agreements with UPPCO are identical to those with the contributing utilities. Those with the contributing municipalities and cooperatives are similar, but do not contain the 85% minimum payment clause.

Name of Respondent	This Report is:	Date of Report	Year of Report				
·	(1) X An Original	(Mo, Da, Yr)					
American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003				
NOTES TO FINANCIAL STATEMENTS (Continued)							

The Company was billed approximately \$75.2 million in 2003 and \$91.4 million in 2002 under these agreements. Accounts payable and accrued liabilities at December 31, 2003 and 2002 include amounts payable to these companies of \$10.3 million and \$18.1 million, respectively.

(c) Transmission Service

The contributing utilities, municipalities, cooperatives and UPPCo are the primary parties receiving service utilizing the Company's facilities under the MISO tariff. As such, the Company has entered into distribution-transmission interconnection agreements with each of the contributing members interconnected to it. In fewer instances, the Company has also entered into generation-transmission interconnection agreements with certain of these parties. Neither type of interconnection agreement contains a provision for the payment of rates or charges, except to provide that the Company shall offer transmission services pursuant to the applicable FERC-approved tariff.

The Company entered into a network integration transmission services agreement and a network operating agreement with each of the contributing utilities. The network integration transmission services agreement specifies the terms of service and the network load which shall be served to each of the contributing members. The obligation to render service under these agreements was transferred to MISO effective February 1, 2002. The network operating agreement specifies the procedures and safeguards each of the contributing members must follow to allow for integration of its load and resources on the Company's system.

Reverues from Wisconsin Electric Power Company, Wisconsin Power and Light Company, Wisconsin Public Service Corporation, Madison Gas and Electric Company and Wisconsin Public Power, Inc. ranged from 85-90% of the Company's transmission service revenue for the years ended December 31, 2003 and 2002.

(d) Lease Agreement with Alliant Energy

Beginning January 1, 2001, the Company entered into a lease agreement with Alliant Energy Corporate Services, Inc., an affiliate of the Company, for a portion of the Company's system operating center in Stoughton, WI and agreed to provide control and operational services at such center to Alliant. Both the lease and the services are being provided to Alliant at cost. Amounts billed under these agreements totaled \$2.7 million in 2003 and \$4.2 million in 2002.

(e) Management Inc.

As discussed in Note 1(b), the Company is managed by Management Inc. Management Inc. charged the Company approximately \$50.1 million and \$39.9 million for 2003 and 2002, respectively, primarily for employee related expenses. These amounts were charged to the applicable operating expense accounts, or capitalized as construction work in progress or other assets, as appropriate. The amounts are recorded in the Company's accounts in the same categories the amounts would have been recorded had the Company incurred the costs directly, except for income tax expense of Management Inc. that is recorded as other expense.

NOTES TO FINANCIAL STATEMENTS (Continued)							

(f) Interconnection Agreements

As discussed in Notes 1(f) and 8(g), the Company has interconnection agreements related to the capital improvements required to connect new generation equipment to the grid. Some of these agreements are with members or affiliates of members of the Company. At December 31, 2003 and 2002, advances and accrued interest related to these agreements totaled \$4.7 million and \$1.0 million, respectively. Of these amounts, \$1.6 million and \$1.0 million, respectively, were included in Account 252, Customer Advances for Construction. At December 31, 2003, \$3.1 million was due to be repaid within one year and was recorded in Account 242, Miscellaneous Current and Accrued Liabilities.

autho 2. U: 3. Ri oubli Provi any o 4. In LF - 1 interr LF, p out o SF -	Report all transmission of electricity, i. e., wheeling, provided for other electric utilities, cooperatives, municipalities, other public uthorities, qualifying facilities, non-traditional utility suppliers and ultimate customers. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c). Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or ubilic authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to rovide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote my ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c). In column(d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: F - for Long-term firm transmission service. "Long-term" means one year or longer and "firm" means that service cannot be terrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as F, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally get ut of the contract. F - for short-term firm transmission service. Use this category for all firm services, where the duration of each period of commitment or service is less than one year.

American Transmission Company LLC	(2) _ A Resubmission	04/01/2004	Dec 31, 2003
	FOOTNOTE DATA		

Schedule Page: 401 Line No.: 20 Column: b

*Network Integration and Point-to-Point Customers provide energy to satisfy the requirements of ATC LLC's Open Access Transmission Tariff Attachment M (Energy Losses)

Schedule Page: 401 Line No.: 28 Column: b

Footnote linked. See note on 401, Row: 20 Col/Item: b

Respondent has left Page 401b blank because it does not generate nor sell electric energy at wholesale for resale nor at retail. Similarly, ATC LLC has no monthly system peak of its own. Because the coincident sum of the peaks of its customers are used in the determination of Load Ratio Share caluclations for Network Integration Transmission customers, the following information is provided:

Month	Day	Hour	Megawatts
January	22	1900	9674
February	4	1900	9192
March	3	1900	9351
April	7	1100	8825
May	30	1400	8844
June	25	1400	11786
July	7	1700	10974
August	21	1400	12708
September	8	1600	10872
October	28	1800	8958

		, , ,		MISSION LINE										
kilovo 2. Tra subst	Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 cilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.  Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.  Report data by individual lines for all voltages if so required by a State commission.  Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.													
						Nonutility Pro	perty.							
	Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction													
٠,	(4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction													
•	the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the													
	emainder of the line.													
	6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is eported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report													
pole i	reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with													
respe	ect to such structures are include	ed in the expenses repo	rted for	the line designa	ted.

7. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines as one line. Designate in a footnote if you do not include Lower voltage lines with higher voltage lines. If two or more transmission line structures support lines of the same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g)  8. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line, name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.  9. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.  10. Base the plant cost figures called for in columns (j) to (l) on the book cost at end of year.

TRANSMISSION LINE STATISTICS									
1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132									
kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage.									
2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.									
3. Report data by individual lines for all voltages if so required by a State commission.									
4. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.									
5. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower;									
or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction									
by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the									
remainder of the line.									
6. Report in columns (f) and (g) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is									
reported for the line designated; conversely, show in column (g) the pole miles of line on structures the cost of which is reported for another line. Report									
pole miles of line on leased or partly owned structures in column (g). In a footnote, explain the basis of such occupancy and state whether expenses with									
respect to such structures are included in the expenses reported for the line designated.

#### GENERAL DESCRIPTION OF CONSTRUCTION OVERHEAD PROCEDURE

The original cost of construction includes an allowance for funds used during construction (AFUDC) as an indirect cost.

AFUDC represents the approximate cost of debt and equity capital devoted to plant under construction. The portion of the allowance that applies to: (1) borrowed funds is presented in the Statement of Operations as a reduction of interest expense and (2) equity funds is presented as other income. Although the allowance does not represent current cash income, it is recovered under the ratemaking process over the service lives of the related assets.

AFUDC is capitalized monthly on plant expenditures less contract retainage and accounts payable accruals. The weighted average rate is adjusted to compound semi-annually.

Note: Payroll taxes and benefits are not included as an overhead as they directly relate to the direct labor dollars being charged.

1. Components of Formula (Derived from actual book balances and actual cost rates):

Line No.	Title (a)		Amount (b)	Capitalization Ratio (Percent) ( c )	Cost Rate Percentage (d)
	Average Short-Term Debt & Computation of Allowance				
1	text	S	14,708,333		
2	Short-term Interest	1			s 12.00%
3	Long-Term Debt	D	348,032,589	52.50%	d 7.35%
4	Preferred Stock	P	0	N/A	p 7.50%
5	Common Equity	С	314,934,045	47.50%	c 12.20%
6	Total Capitalization	1	622,966,904	100.00%	
	Average Construction Work				
7	in Progress Balance	W	58,767,745		

2. 0	Bross Rate for Borrowed Funds	Ai = s(S/W) + d(D/D + P + C) (1 - S/W)	3.19%

3. Rate of Other Funds: Ae = [1 - S/W] [p (P/D + P + C) + c (C/D + P + C)] 4.34%

4. Weighted Average Rate Actually Used for the Year:

a. Rate for Borrowed Funds -

3.19%

b. Rate for Other Funds -

4.34%
